

## Nuera provides a range of Pulley Lagging

Illustration	Type	Use
	<b>Diamond Lagging</b>	Standard lagging to improve traction between the conveyor belt and the head pulley
	<b>Semi Ceramic Lagging</b>	For applications that require higher grip and/or good resistance to abrasion
	<b>MSHA Lagging</b>	Essential in grain handling and underground mining applications where MSHA standards are required
	<b>Slide Lag</b>	Useful alternative to cold vulcanization when time and/or manpower are factors
